

DKR 36 is a lightweight (4 kg) pneumatic combi drill/hammer that works in both rotary-only and rotary-percussion modes, making it ideal for drilling and chipping with one tool. It can drill up to **36 mm diameter** and **300 mm depth** in concrete, masonry, and rock, while requiring low feed force for easier operation. Its compact size makes it perfect for tight or hard-to-reach areas, renovation work, and general demolition/chipping tasks. The **DKR 36R** round-shank version is especially suited for underwater and marine repairs, as it helps free a stuck bit by rotating the tool. An in-built lubricator supports long, uninterrupted shifts with reduced downtime.

Specification

Model #	DKR 36R	
Weight	4.5 kg	10 lb
Length	375 mm	14.8"
Air pressure	6.2 bar	90 psi
Air consumption	10 l/s	21 cfm
Hose connection	19 mm	¾"
Shank size Round	19 x 95 mm	¾" x 3 ¾"
Blows per minute	2820	
Revolutions	250 rpm
