

The RH 656 4W is a genuine, original Atlas Copco jackleg drill (8311 0302 02), built for horizontal and angled drilling in underground mines and tunnels. Like all jackleg drills, it's designed to be paired with a pusherleg model, RMT 62S which carries the drill's weight so the operator can focus on guiding it accurately. At 22 kg, the RH 656 4W is one of the lighter drills in the Jackleg range, making it easier to carry and reposition across a shift without sacrificing drilling performance.

## Specification

| Model #                   | RH 656 4W   |            |
|---------------------------|-------------|------------|
| Weight                    | 22 kg       | 48.5 lb    |
| Length                    | 630 mm      | 24.8"      |
| Hole range                | 27 - 41 mm  | 1" - 1.63" |
| Hole depth                | 6 meters    | 19.6 ft    |
| Air pressure              | 6 bar       | 87 psi     |
| Air consumption           | 48 l/s      | 102 cfm    |
| Blows per minute          | 2040        |            |
| Piston dia                | 65 mm       | 2.56"      |
| Piston stroke             | 60 mm       | 2.36"      |
| Air inlet                 | 19 mm       | ¾"         |
| Shank size - 8311 0303 45 | 22 x 108 mm | ⅞" x 4¼"   |
