

RMT 133D Rivet Busters are low weighted but heavy-duty powerful hammers with a teasing throttle. It is equivalent to **APT 133D Rivet Buster**. It is ideally suited for bridge deck repair due to its optimal weight and performance. It is also a preferred choice for applications such as cutting up underground storage tanks and other demanding demolition work.

What is good about it?

- 8" stroke
- Drop forged, D-style steel handle
- Inside trigger for better control and safety
- Deep case-hardened alloy steel cylinder
- Uses Jumbo extra heavy duty tool steel
- Heavy duty upper and lower sleeves

Where it is used?

- ➡ Cutting and removing large rivets and bolts
- ➡ Cutting metal tanks or plates
- ➡ Bridge deck work where breaker weight is a problem
- ➡ De-capping foundation pillars on hard concrete
