

TEX 03 PS Chipping Hammers are light hammers most suitable for overhead work where the working area is tricky or difficult to work on. The area behind pillars, and under stairs, are a few examples where working is difficult. For working in these areas you need a hammer that is light enough to use at any angle, even upwards, and still has enough power to do the job.

What is good about it?

- Soft start
- Easy to use
- Light weight
- Durability

Where it is used?

- Renovation and structural alteration work
- Chipping concrete
- Roughening surfaces
- Hole making
- Chasing and trimming of various materials

Specification
