

TEX 20PS is a **lightweight breaker** that can handle most tasks. The breaker is made from one-piece housing. It does not have bolts that are often required to keep the machine together. This breaker has much lesser parts than other breakers of this category. Fewer parts make it an "Easy for servicing tool". It results in faster and more economical maintenance of the tool. Despite its moderate weight, it still delivers powerful strokes. **RMT 1210** is also an excellent choice in the same weight range of breakers.

What is good about it?

- Great balance
- One piece housing
- Piston turns on air cushion

Where it is used?

- Light to medium construction
- Utility and plant maintenance work such as demolition of floors, pavements and road surface
- Bridge deck jobs

Specification
