

RMT rock drills are a combination of high performance and reliability. It has low spare parts consumption so maintenance cost is at its minimum. Though simple to operate, they are robust and even with low air consumption, they offer high impact. Along with their pusher legs, they are proved to be cost saving drilling unit without compromising on production.

What is good about it?

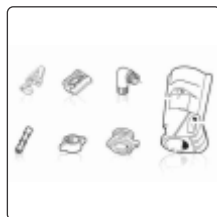

- High penetration rate
- Can drill from medium to hard rock
- Rifle Bar rotation mechanism

Where it is used?

- Under Ground Mining
- Metal Mining
- Tunnel
