

RMT rock drills are a combination of high performance and reliability. It has low spare parts consumption so maintenance cost is at its minimum. Though simple to operate, they are robust and even with low air consumption, they offer high impact. Along with their pusher legs, they are proved to be cost saving drilling unit without compromising on production.

### What is good about it?

- High performance rock drill for soft to hard rock
- Short stroke and high impact rate makes it ideal for soft rock
- Large piston diameter for high efficiency even at low air pressure
- Ratchet wheel rotation mechanism

### Where it is used?

- Under Ground Mining
- Metal Mining

### Specification

Model #	BBD 94W	
Weight	27 kg	59.5 lb
Length	670 mm	26.40"
Air pressure	6 bar	87 psi
Air consumption	97 l/s	206 cfm
Blows per minute	3300	
Piston dia	90 mm	3.54"
Stroke	55 mm	2.17"
Air inlet	25 mm	1"
Shank size	22 x 108 mm	7/8" x 4 1/4"
Reference #	8311 0303 44	

9th Dec 2019 / 100.09.04
