

**RMT 91RS Jackleg/Pusherleg** is a single telescopic support designed for efficient rock drilling, compatible with the **BBD 94WS** rock drill. It provides a **300 mm** feeding length with an adjustable working range from **1870 mm** (retracted) to **3170 mm** (extended). Built for stable, controlled drilling performance, it weighs **24 kg** and features a **67 mm** piston bore for reliable thrust.

### Specification

| Model #                 | RMT 91RS |         |
|-------------------------|----------|---------|
| Telescope               | Single   |         |
| Suitable for Rock Drill | BBD 94WS |         |
| Feeding length          | 1300 mm  | 51.18"  |
| Length retracted        | 1870 mm  | 73.62"  |
| Length extracted        | 3170 mm  | 124.80" |
| Weight                  | 24 Kg    | 37 lb   |
| Piston bore             | 67 mm    | 2.08"   |
