

RMT CW-190 is track mounted Pneumac Drill machine with newly modified boom-bare. RMT CW-190 is mounted with Square boom-bare with self-contained dump shaft. Due to this feature at the time of transportation no need to change shaft pin to change degree of mast.

### Salient Features

- 1. SINGLE DUMP PIN SHAFT** – Dump shaft is developed with single pin which can adapt to long dump cylinder. Such modification removes the need of manually drive out and insert the dump shaft pin for changing the position of mast at the time of operation. It means customer will save a lot of time and energy at the working hour.
- 2. SQUARE TYPE BOOM BARE** – Heavy duty square type boom bare gives more strength and robustness to the boom bare which increase life of the product.
- 3. HEAVY & LONG GUIDE DUMP CYLINDER** – Compared to other drill machines, this machine has longer boom bare cylinder which gives smoother operation and strength to the mast, resulting increased life of boom bare.

### Specification

Model #	RMT CW 190
Holy Capacity	Drilling max 125 mm dia holes
Mounting	Crawler Mounting
Feed	Chain Feed driven by air motor and gear box
Self - propulsion	Each track is independently driven by an air motor
Type of Drive	By air motor & gear box
Tramming Speed	0 - 32 Km / h
Equipment Weight	2600 kg
Gradeability	30°

1. Single Pin Dump Shaft

2. Square Type Boom Bare

3. Heavy Long Cylinder
