

CP 1260 SVR is a version of CP 1260. CP 1260 SVR model comes with a "silencer" and "vibration reduced handle". With its new backhead design and new muffler, the CP 1260 SVR combines excellent performance in its weight class with good ergonomics. Lowering the vibration levels offers immense benefits to the operator. They do not tire easily so it increases their productivity. Reduced vibration levels also control its negative effects on operators.

What is good about it?

- Advanced vibration reduction system
- Improved valve system
- Piston with lubrication grooves
- Teasing throttle
- Improved swivel

Where it is used?

- Tough construction and plant maintenance work
- Medium to heavy concrete demolition
- Breaking reinforced concrete, heavy road work & general demolition
