

RMT CW-190 is track mounted Pneumatic Drill machine with a newly modified boom-bare. RMT CW 190 is mounted with a Square boom-bare with a self-contained dump shaft. Due to this feature at the time of transportation no need to change the shaft pin to change the degree of the mast.

Salient Features

- 1. SINGLE DUMP PIN SHAFT** – Dump shaft is developed with single pin which can adapt to long dump cylinder. Such modifications moves the need of manually drive out and insert the dump shaft pin for changing the position of mast at the time of operation. It means customer will save a lot of time and energy at the working hour.
- 2. SQUARE TYPE BOOM BARE** – Heavy duty square type boom bare gives more strength and robustness to the boom bare which increase life of the product.
- 3. HEAVY & LONG GUIDE DUMP CYLINDER** – Compared to other drill machines, this machine has longer boom bare cylinder which gives smoother operation and strength to the mast, resulting increased life of boom bare.

Specification

Model #	RMT CW 190 Pro	
Working Weight	2890 kg	6370 lbs
Drill Type	DTH / TH	
Hole Diameter DTH	90 -127 mm	3 ½" - 5"
Hole Diameter TH	32-72 mm	1.25" - 2.83"
Rod Length	3 m	10 ft
Hole Depth	15 m	50 ft
Air Compressor for DTH	450 to 550 cfm	150 to 200 psi
Air Compressor for TH	400 to 600 cfm	100 psi
Tramming Speed	3 km/hr	1.86 mil/hr
Dimensions (L x W x H)	5 x 2 x 2.5 meters
