

An efficient solution for weld flux removal and light chipping, widely used in fabrication shops, shipyards, and R&D facilities.

### Specification

| Model #                | RMT C455L              |
|------------------------|------------------------|
| Part number            | Z0015825               |
| Actual air consumption | 444 l/mn               |
| Air inlet thread size  | 1/4"                   |
| Blows per minute       | 4800                   |
| Bore                   | 4800                   |
| Chisel rivet set shank | 12.7 mm                |
| Length                 | 457 mm                 |
| Min. hose size         | 10 mm                  |
| Needle capacity        | 19 x 1/8 (3)           |
| Net weight             | 2.8 kg                 |
| Power (Joules)         | 5.3 joule              |
| Shank                  | Square                 |
| Stroke                 | 28.35 mm               |
| Vibration              | 11.41 m/s <sup>2</sup> |
