

RMT 30 Oil Bottles lubricate pneumatic tools using ONLY mineral oil. Air flows through the lubricator from the air inlet, partly directly to the pneumatic machine and partly through the air pipe into the oil chamber. It works on the ejector principle. These 1.3 liters (.34 gallon) capacity lubricators are mostly used with handheld pneumatic tools. Because of its "turtle" shape, it withstands the rough handling and dragging on the job sites. Refilling is easy and fast. The use of RMT 30 reduces the wear of the tool and thus the need for the tool's maintenance.

What is good about it?

- Precise oil regulation control
- Versatile and rugged design
- Enhances drill life and efficiency

Where it is used?

- RMT 30 M is recommended for pneumatic breakers and rock drills with mineral oil

Specification

Model #	RMT 30 M	
Oil volume	1.3 litre	0.34 gallon
Hose connection	25 mm	1
Air flow	25-130 l/s	53-282 cfm
Max pressure	20 bar	290 psi
Weight	4.1kg	9 lbs
Reference #	-	

11 Feb 2026 / RMT 100.15.01
