

Hose Pipes are the primarily required accessories to use any kind of pneumatic tools. The quality of the hose pipe needs to be the best to avoid leakage and accidents.

Features :

- **Reinforcement:** It uses a unique technology where high-tensile synthetic yarn is woven between two thermoplastic (PVC) layers for superior adhesion and pressure resistance.
- **Durability:** The outer yellow cover is specifically formulated to be abrasion-resistant, weather-resistant, and rodent-proof.
- **Compatibility:** Optimized for use with tractor-mounted compressors and jackhammers in marble, granite, and open-cast mining.

Lubricator

Specification

Model #	RMT Hose Pipe
Inner Diameter (ID)	20 mm (3/4 inch)
Wall Thickness	4.00 mm
Maximum Working Pressure	20 kg/cm ² (approx. 20 Bar or 290 PSI)
Bursting Pressure	60 kg/cm ² (approx. 60 Bar or 870 PSI)
Material Construction braiding	Reinforced Heavy-Duty PVC with synthetic yarn
Maximum Temperature	Typically rated up to 60°C (140°F)
Standard Roll Lengths	30m, 50m, or 100m
